**Recipient of the Department of  
Defense Award for  
Vendor Excellence**

# PVC (Chlorine) Free "Super-Tuff" "Forensic Photo Blue" Transport Pouch

Impervious, abrasion resistant and highly tear resistant co-extruded scrim supported polyethylene material highly resistant to zipper tear-out without use of reinforcement tape.

Material complies with EPA burn restrictions involving the release of chlorine gas, thereby eliminating the disposal problems associated with vinyl materials.

This material also remains flexible down to -70 degrees F. (-57 degrees C.) so that it can be used in outdoor winter environments or morgue coolers without fear of "cracking".

Blue color to enhance post mortem forensic photography study without removing remains from the bag (Also available in black or white upon request).

Adult size bag available with dual No. 8 (HD) zipper pulls to facilitate opening and closing bag. 300 Lb Static Lift Tested

Heat-sealed ends with **UNIQUE NO SIDE SEAM CONSTRUCTION** to comply with OSHA Reg. 3130.

# Unique WMD BioVu™ HD Transport Pouch

- Unique optically clear interior vinyl panel allows viewing the remains contained in the bag with minimal exposure risk to personnel. Secured inner panel also allows for examination of remains while maintaining "Chain of Custody" integrity using our serialized tamper resistant zipper pull seals.
- All seams are 100% RF heat sealed to eliminate any possible leakage. Designed for today's "high-risk" bio-hazard exposures (Complies with OSHA Reg. 3130 - Universal Precautions)
- Envelope style heavy-duty zipper with dual zipper pulls
- Exterior material is 18 Mil HD abrasion resistant vinyl scrim supported and reinforced vinyl
- Eight (8) padded handles RF welded directly into and are integral to the bag material for comfortable handling during transport. This eliminates the exterior sewn or riveted "webbing" style handles used on traditional transport body bags. This feature avoids webbing "tear-out" or failure during rough handling, while maintaining the fluid tight integrity of the bag.
- Static Lift Tested to 750 LB Capacity. Easily lifted by helicopter or crane using standard webbing style sling.
- Available with optional attached clear document pouch (Standard on the BioVu™ Models)
- Available in standard 36" W x 94" L or extra large 54" W x 108" L

**NEW !!!** – All Medicalproduct transport pouches are available in lots of 100 with RFID (Radio Frequency Labels) included with each bag. This allows electronic identification without opening the bag and thereby reducing risk of those engaged in processing remains following recovery by First Responder personnel.

With few exceptions, our Transport Pouches are proudly **Made In America!**
